

# Donald Yeh

Software Engineer | Atlanta, GA  
(678) 360-3029 | [donald.yeh@gmail.com](mailto:donald.yeh@gmail.com)

<https://www.linkedin.com/in/donald-yeh-b3b1426> | <https://github.com/DonYeh> | [donaldyeh.dev](https://donaldyeh.dev)

I'm a creative software engineer with a love for learning and the ability to pick up new languages. I enjoy designing functional user experiences and I'm seeking a challenging and fulfilling position with a focus on front end technologies.

## Technologies

Front-End: HTML5, CSS3, JavaScript(ES6+), Typescript, React, React Native, Angular, Bootstrap

Back-End: Node.js, Express, Python, PostgreSQL, SQL

Deployment & Development Tools: AWS, Git/GitHub, Visual Studio Code, Mocha, JasminT

## Education

DigitalCrafts | Atlanta, GA | Certificate in Software Engineering February - June 2019

- Full Stack software development - 16 week full-time immersive coding bootcamp

Georgia Institute of Technology | Atlanta, GA | Master of Business Administration June 2011 - 2013

Bachelor of Science - Electrical Engineering August 1999 - 2007

## Projects

Chatris | <https://github.com/A-DiRusso/Chatris> May 2019

- A full-stack React-Native application for both iOS and android featuring live video chat while playing Tetris.
- Requires fluid knowledge of Xcode, Android Studio, state, props, components and life cycle methods.
- The front-end is built with React Native, WebSocket, OpenTok, and Axios
- The back-end is hosted via AWS, written in Node.js, Express, and PostgreSQL.

Learn Share Code | <https://github.com/DonYeh/learn-share-code> April 2019

- Member of a 4-person team that built a coding resource library with references to methods for various languages along with relevant code snippets, videos, and articles.
- Users are able to sign in via their GitHub account and can submit requests to create, update, delete methods.
- Back-end project built with Node.js, Express, PostgreSQL, Javascript, Bootstrap, OAuth.

Movie Explorer | [movie.bugbuyte.dev](https://movie.bugbuyte.dev) | <https://github.com/benhal1847/movie-explorer> March 2019

- Member of a 3-person development team that built a website used to search and discover movies.
- Movie search results include poster art along with a movie trailer, description, ratings, and cast information.
- Front-end project built with HTML, CSS, Javascript

## Experience

Ton Ton Ramen & Yakitori | Atlanta, GA | Server September 2016 - present

- Trained new hires and created training materials along with a checklist of server side work duties.
- Filled in as a manager when needed - responsibilities included resolving customer issues, entering shift reports, and inventory.
- Developed valuable soft skills, which include communication, teamwork, multitasking, and working under pressure.

Elev8 Hire Solutions | Atlanta, GA | IT Recruiter Nov 2015 - Sep 2016

- Performed full sales recruiting lifecycle from prospecting, job selling, screening, offer negotiation and onboarding.
- Maintained an accurate candidate tracking system
- Worked in close collaboration with Account Managers, CEO and recruiting team to execute sourcing strategies.
